

## General Characteristics

Cathode		Thoriated Tungsteno
Heating		Direct
Filament Voltage		7.5±0.37V
Filament Current		51.5A
Interelectrode Capacitances (cathode earthed) approx	Input	38.0pF
	Output	0.6pF
	Feedthrough	24.0pF
Transconductance		55mA/V
Amplification Factor - medium		160
Operational Position		Vertical, anode up or down
Weight		2.8 Kg
Frequency		110MHz
Anode	Voltage	5 KV
	Current	2.5A
	Cooling affected	AirAnode
Temperature on the candid of the tube,max.		250Anode
Dissipation		4KW
Applique dissipation		225W
